

TED® Foldable Cable Dispenser

TED®

Perfect for unwinding small cable reels (fibre optic, RJ45, IRVE) and draw rope or switch wire up to 500mm in diameter and 45kg without jamming. Mobile and easy to use, this TED® dispenser is equipped with wheels and a strap handle.

No need to disassemble the reel or carry it between 2 construction sites. Moving the reel and its reel is done with one hand and effortlessly by rolling it. The strap handle is adjustable and adjusts to the engineer's height.

Stability during unwinding is ensured by two silentblocs on the front tube of the reel. Simply place the reel on the ground for it to be operational.

This TED® reel is particularly practical for deployments in medium to low-density areas (peri-urban areas and countryside). It saves time during deployments by ensuring smooth cable unwinding, and during travel, without taking up space in the vehicle. Whether folded or installed on the reel, the TED® reel takes up minimal space.

PN	DESCRIPTION	DIMENSIONS	WEIGHT	QTY
1001382	TED® Foldable Cable Dispenser Ø500 mm max - 45 kg	L 660mm x P 34,3mm x H 690mm	5,4 kg	Unit

FEATURES & BENEFITS

- Tubular steel structure
- Silentblocs at the front to ensure good grip when unwinding the cable
- Adjustable strap handle
- Locking pin axle
- The wheels are to be mounted on the chassis using 2 13 mm socket wrenches

TECHNICAL CHARACTERISTICS

- Max diameter: 500mm
- Max Width: 570mm
- Max weight: 45kg

FEATURES & BENEFITS

- Foldable
- Enhanced mobility
- Ultra light
- Suitable for reels with damaged or broken drums
