

TELENCO® DAB

DOUBLE ANCHORING BRACKET

The Telenco® DAB double anchor is made of aluminum alloy and offers high mechanical strength. Its unique design offers a compact solution to realize single or double anchoring of cable(s). The DAB can also be used as a cross-arm fastening. Its retaining lugs allow the use of assembly bolts to be reduced or eliminated (depending on the method of fixing to the support). It can be fastened with a single through bolt or with two steel bands, making it suitable for installation on any type of support.

FEATURES & BENEFITS

- Compact and lightweight model: compatible with wood, metal, composite or concrete poles.
- Versatile product: allows for single/double anchoring or cross-arm support
- Equipped with anti-rotation lugs (cross-arm)
- Fastening with a single through bolt or with two steel bands

TECHNICAL CHARACTERISTICS

Material		Aluminium
MBL*	Face	6000N
	Side	10000N
Climatic test		NF EN C-20-540
Corrosion test		NF EN IEC 60068-2-52
UV protection		EN 50289-4-17

*MBL: Minimum Breaking Load

INSTALLATION

- On a non-drillable pole using two steel bands equipped with buckles (and a 1/12 bolt to fix a cross-arm)
- On a drillable or pre-drilled support using a Ø14mm through bolt
- Opposite an existing bracket fixed with a Ø14mm through bolt using an HM14 nut
