

DISTRIBUTION FRAME

FRAME DISTRIBUTION 108E - 700 PAIR

The Frame Distribution 108E is supplied as a Single Vertical Modular Distribution Frame offering 700 pair capacity using 10 pair Strips Connection 237A.

Modular construction means that the units may be assembled side-by-side for wall mounting, or back-to-back for free-standing applications.

Cable management is provided by using large jumper rings fitted top, bottom and between terminal banks, whilst individual terminal blocks are provided with fixed fanning strips.

PN	DESCRIPTION	UNIT
T5014	Frame Distribution 108E - 700 Pair	1

Weight: 18kg

FEATURES & BENEFITS

- High Capacity Management
- Space-Saving Design
- Improved Airflow Management
- Secure Cable Routing
- Industry Compliance
