

RGH2

FRONT & REAR D SAFETY HARNESS RGH2

This two point safety harness has both a rear and chest mounted front attachment point.

The two attachment points extend this harness's working capability. Meaning it can be used for fall protection and restraint situations in either vertical or horizontal planes. The ring connection between the chest and shoulder straps ensures no stress loading when force is applied to the front D ring. High contrast stitching makes inspection easier. The addition of a flexible rear D pad provides additional comfort. The inclusion of easy slide shoulder buckles increases the range of adjustment. The way the harness has been designed minimises the amount of rigid webbing edges. A variety of devices can be used with the harness, but check for suitability.

/ Front & rear attachment point

EN 361:2002

Web material:	45mm RIDGE Protect anti-bacterial polyester*
Max user weight:	140kg
Fittings:	High tensile steel alloy
Weight:	1.1kg standard 1.3kg comfort
