

# RGR2

## TRI PULLEY RGR2

This RIDGEGEAR tri-pulley has been specially developed to enable both the RGA4 3-way fall arrest recovery block, and RGR7 rescue winch to be fitted together on the same RGR1 tripod.

- You can now connect a fall arrest system as a back up to the main man-riding winch.
- It can be easily fitted to either of the two EN795 eye-bolts which are positioned below the main head unit.
- We recommend a RGK1 or RGK2 karabiner for connection to the eye-bolts.

EN 12278:2007

Material:	Stainless steel
Weight:	390g
Dimensions:	L 104 x W 70 x D 25mm
Breaking load:	40kN
