

SPLICE PROTECTION SLEEVE

45MM SLEEVE

45mm Splice Protection Sleeves are high-quality heat-shrinkable sleeves designed to protect fibre optic splices. Featuring a durable transparent outer tube and a reinforcing steel or ceramic rod, these 45mm sleeves provide robust protection for spliced fibres, ensuring the splice is shielded from environmental factors like moisture, dust, and temperature changes

CODE	DESCRIPTION	UNIT
F4203-50	Splice Protection Sleeve 45mm	50

FEATURES & BENEFITS

- Waterproof protection of splice
- Wide temperature range
- Prevents signal loss
- Steel rod provides additional strength
